Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/662,603	Applicant(s) RAMEY ET AL.	
	Examiner Charles E. Anya	Art Unit 2194	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3/ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 03 November 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 35,37-40,42-45,47-50 and 52-64 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 35,37-40,42-45,47-50 and 52-64 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Claims 35, 37-40, 42-45, 47-50 and 52-64 are pending in this application.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 35, 37-40, 42-45, 47-50 and 52-63 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 64,74 and 84 of copending Application No. 2005/0008003 A1 (hereinafter referred to as Ramey’8003) in view of U.S. Pat. No. 5,945,989 to Freishtat et al.

This is a provisional obviousness-type double patenting rejection.

Art Unit: 2194

3. As to claim 35, Ramey'8003 teaches a method performed by a wrapper for enabling a web application to communicate with a telephone system, comprising: providing a communication channel between the web application and the telephone system (claim 64 lines 3-4); and translating web application commands transferred from the web application to the telephone system from a web application format into telephone system format (claim 64 lines 6-8).

Ramey'8003 is silent with reference to a method performed by a wrapper for enabling a web application to communicate with a call server system.

Freishtat teaches a method performed by a wrapper for enabling a web application to communicate with a call server system (Server 697 Col. 11 Ln. 24 – 52).

It would have obvious to one of ordinary skill in the art at time the invention was made to modify the system of Ramey'8003 with the teaching of Freishtat because the teaching of Freishtat would improve the system of Ramey'8003 by providing mechanism for managing telephony resources and allows multiple client applications to connect and interface with a server (Freishtat Col. 11 Ln. 41 – 44).

4. As to claims 37-40, 42-45, 47-50 and 52-63, they are rejected under the judicially created doctrine of obvious double patenting for the same reasons as stated in the rejection of claim 35 above.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 35, 38-40, 43-45, 48-50 and 53-64 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Pat. No. 5,915,008 to Dulman.

6. As to claim 35, Dulman teaches a method performed by a wrapper for enabling a web application to communicate with a call server system (figure 2), comprising:

providing a communication channel between the web application ("...GUI-based access..." Col. 10 Ln. 10 – 30) and the call server system (figure 2 Access Server 48 Col. 10 Ln. 10 – 65); and

translating web application commands transferred from the web application to the call server system from a web application format into a call server system format ("...converts the CPE service request..." Col. 12 Ln. 35 – 45, "...translate...software based modules 74, 76, 78 and 80..." Col. 13 Ln. 14 – 49, Col. 14 Ln. 16 – 30, AIN/API 80 Col. 15 Ln. 35 – 60, Step S112 Col. 19 Ln. 6 – 15), wherein the translating web application commands further comprises translating a call control command ("...call

Art Unit: 2194

forwarding, selective call blocking etc..." Col. 13 Ln. 40 – 49, "...caller abandon function..." Col. 14 Ln. 1 – 15, Col. 20 Ln. 9 – 32).

7. As to claim 38, Dulman teaches the method of claim 35 wherein the translating web application commands further comprises translating a service control command ("...converts the CPE service request..." Col. 12 Ln. 41 – 43, Col. 13 Ln. 13 – 16, Col. 15 Ln. 37 – 49).

8. As to claim 39, Dulman teaches the method of claim 35 further comprising translating call server commands transferred from the call server system to the web application from the call server system format into the web application format ("...translates the received call processing data back..." Col. 20 Ln. 20 – 28).

9. As to claims 40, 45 and 50, see the rejection of claim 35 above.

10. As to claim 43, 48 and 53, see the rejection of claim 38 above.

11. As to claim 44, 49 and 54, see the rejection of claim 39 above.

12. As to claim 55, Dulman teaches a system for web-based control of call server functions comprising: a call server system (figure 2 Access Server 48); a web application ("...GUI-based access..." Col. 10 Ln. 10 - 30);

Art Unit: 2194

a user interface for directing the web application ("...GUI-based access..." Col. 10 Ln. 10 – 30); and

a wrapper for providing a communication channel between the web application and the call server system ("...software based modules 74, 76, 78 and 80..." Col. 13 Ln. 14 – 49, Col. 14 Ln. 16 – 30, AIN/API 80 Col. 15 Ln. 35 – 60) and for translating commands transferred from the web application to the call server system from a web application format into a call server system format, wherein the web application commands comprise a call control command ("...converts the CPE service request..." Col. 12 Ln. 35 – 45, "...translate...software based modules 74, 76, 78 and 80..." Col. 13 Ln. 14 – 49, Col. 14 Ln. 16 – 30, AIN/API 80 Col. 15 Ln. 35 – 60).

13. As to claim 56, Dulman teaches the system of claim 55 further comprising: a web server for providing the web application to the user interface (figure 2 Access Server 48).

14. As to claim 57, Dulman teaches the system of claim 56 wherein the web application comprises: an interactive web page for the web server ("...Hypterext-based system..." Col. 10 Ln. 10 – 30).

15. As to claim 58, Dulman teaches the system of claim 56 wherein the web server comprises: the wrapper ("...software based modules 74, 76, 78 and 80..." Col. 13 Ln. 14 – 49, Col. 14 Ln. 16 – 30, AIN/API 80 Col. 15 Ln. 35 – 60).

16. As to claim 59, Dulman teaches the system of claim 55 wherein the user interface comprises: a personal computer with a web browser (“...Hypertext-based system...” Col. 10 Ln. 10 – 30).

17. As to claim 60, Dulman teaches the system of claim 55, wherein the call server system further comprises: the wrapper (“...software based modules 74, 76, 78 and 80...” Col. 13 Ln. 14 – 49, Col. 14 Ln. 16 – 30, AIN/API 80 Col. 15 Ln. 35 – 60).

18. As to claim 61, Dulman teaches the system of claim 55 wherein the call server system further comprises: a computer telephony interface for communicating with the call server (“...software based modules 74, 76, 78 and 80...” Col. 13 Ln. 14 – 49, Col. 14 Ln. 16 – 30, AIN/API 80 Col. 15 Ln. 35 – 60).

19. As to claim 62, Dulman teaches the system of claim 55 wherein the call server system further comprises: a computer telephony interface server comprising a computer telephony interface (“...software based modules 74, 76, 78 and 80...” Col. 13 Ln. 14 – 49, Col. 14 Ln. 16 – 30, AIN/API 80 Col. 15 Ln. 35 – 60).

20. As to claim 63, Dulman teaches the system of claim 62 wherein the computer telephony interface server comprises; the wrapper (“...software based modules 74, 76, 78 and 80...” Col. 13 Ln. 14 – 49, Col. 14 Ln. 16 – 30, AIN/API 80 Col. 15 Ln. 35 – 60).

As to claim 64, Dulman teaches the method of claim 35 wherein the call control command comprises a combination of call control command primitives (“...call forwarding, selective call blocking portable number service, etc...” Col. 13 Ln. 40 – 49, “...caller abandon function...” Col. 14 Ln. 1 – 15, Col. 20 Ln. 9 – 32).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

21. Claims 37, 42, 47 and 52 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 5,915,008 to Dulman in view of U.S. Pat. No. 5,867,494 A to Krishnaswamy et al.

22. As to claim 37, Dulman is silent with reference to the method of claim 36 wherein the translating a call control command further comprises translating a conference call control command.

Krishnaswamy teaches the method of claim 36 wherein the translating a call control command further comprises translating a conference call control command (“...converts the call to a bonding call...” Col. 142 Ln. 1 – 49).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Dulman with the teaching of Krishnaswamy because the teaching of Krishnaswamy would improve the system of Dulman by providing an operator software for managing call conferences, scheduling and creating list of connections fro the call conferences (Krishnaswamy Col. 152 Ln. 32 – 36).

23. As to claims 42, 47 and 52, see the rejection of claim 37 above.

Response to Arguments

Applicant's arguments filed 10/20/08 have been fully considered but they are not persuasive.

Applicant argues in substance that (1) the double patenting rejection would be moot if the instant application or application number 2005/0008003 were to be amended, (2) the Dulman prior art does not teach a communication channel between a web application and a call server because the web application is disposed or resident on the call server, and (3) the Dulman prior art does not teach “call control commands”.

The Examiner respectfully traverses Applicant's arguments:

As to point (1), the Examiner would continue the double patenting rejection since the rejected claim has not been amended.

As to point (2), the Dulman prior art discloses a customer transaction data processing system that automatically converts transaction data representing user-specific data for intelligent network services and supplied as part of a customer service

Art Unit: 2194

request into AIN-compatible provisioning data. The customer transaction data processing system provides the AIN-compatible provisioning data with the necessary AIN interface protocols corresponding to the programmable AIN nodes that receives the AIN-compatible provisioning data. The customer transaction data processing system include customer premises equipment (CPE 16) and access server (Access Server 48) that communicate using **communication channel** (e.g. packet switched network (Packet Switched Network 44)). Customer service requests (e.g. call forwarding, selective call blocking, call roaming) from the customer premises equipment are translated into network element compatible data by the access server using plurality of software modules (Col. 13 Ln. 28 – 35). The customer premises equipment that includes CPE 16a, Customer Terminal 16b and User Telephones 12 makes these customer service requests/accesses the internet/the access server (Access Server 48) using web application (e.g. “GUI-based” Hypertext Markup Language (HTML)).

As to point (3), contrary to Applicants assertion the Dulman prior art does teach “call control command”. Page 9, paragraph 3 of the instant disclosure describes “call control command” as follows:

“...A call control command causes call server 137 **to perform a function which controls a telephone call...**”

If call processing, call forwarding, selective call blocking and portable number service as disclosed by the Dulman prior art are not telephone call control functions, I do not know what is.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles E. Anya whose telephone number is 571-272-3757. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on 571-272-3756. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
